

## INTRODUCING VAGOHEALTH: THE ULTIMATE SOLUTION FOR TRICHOMONIASIS

Are you aware of Trichomoniasis? It's time to take control of your intimate health with VagoHealth – the revolutionary plant-based solution for the selective treatment of Trichomoniasis, a common sexually transmitted disease (STI). Don't let Trichomoniasis disrupt your intimate life; choose VagoHealth for a healthier, happier you!

### WHAT IS TRICHOMONAS VAGINALIS?

Trichomonas Vaginalis is a parasitic protozoan responsible for Trichomoniasis, one of the most prevalent STIs globally. This microscopic parasite can affect both men and women, leading to various complications if left untreated.

### THE IMPACT ON MEN AND WOMEN:

Trichomoniasis can cause severe health issues for both genders, including:

For Women:

- Grey or yellowish vaginal discharge
- Vaginal bleeding
- Genital burning and swelling
- Frequent urination
- Pain during intercourse
- Increased risk of complications during pregnancy, such as premature delivery and low birth weight
- Potential female sterilization

For Men:

- Urethral discharge
- Burning during urination or after ejaculation
- Frequent urination
- Risk of male sterilization

### MAINTAIN YOUR VAGINAL PH BALANCE

A healthy vaginal pH level should ideally be between 3.8 and 4.5, similar to the pH of a tomato. Many women unknowingly disrupt this balance by using soaps for vaginal cleaning, leading to a host of issues.

### THE IMPORTANCE OF VAGINAL FLORA

A balanced vaginal flora dominated by acidophilic lactobacillus and bifidus lactobacillus can protect against infections of the reproductive system. These beneficial bacteria act as a defense against harmful invaders like Neisseria Gonorrhoea, Gardnerella Vaginalis, and Trichomonas Vaginalis. Over 50% of women with bacterial vaginosis experience recurrences.

## DON'T LET TRICHOMONIASIS COMPROMISE YOUR HEALTH! WHY CHOOSE VAGOHEALTH?

MenidiMedica Biotech Greece, the Faculty of Public Health at the University of West Attica, and the Laboratory of Molecular Biology and Immunology at the Department of Pharmacy, University of Patras present VagoHealth, a plant-based formulation designed to selectively treat Trichomoniasis within just 48 hours. Our plant-based product is laboratory-tested and proven to eliminate Trichomonas Vaginalis without disrupting the natural vaginal flora. VagoHealth offers a revolutionary solution for the selective treatment of Trichomoniasis. Here's why you should consider it:

- **Swift Elimination:** VagoHealth is designed to eradicate Trichomonas Vaginalis within 48 hours, providing rapid relief and peace of mind.
- **Preserves Vaginal Flora:** Unlike some treatments that disrupt the natural vaginal flora, VagoHealth has been meticulously formulated to protect it. It won't harm the beneficial bacteria that help maintain a healthy pH level.
- **Easy to Use:** Our VagoHealth plant-based kit make treatment a breeze.

## JOIN THE MOVEMENT FOR BETTER VAGINAL HEALTH

Did you know that 42% of women claim they were never taught how to take care of their vaginal hygiene? With VagoHealth, you can take control of your intimate health and maintain a balanced vaginal flora to protect against infections.

### HOW TO USE VAGOHEALTH

- Collect a sample from the vaginal or urethral area.
- Use the VagoCheck kit for quick identification.
- Apply VagoHealth topically as directed by your physician, urologist, or gynecologist in accordance with the prescribed treatment regimen, which may extend up to 48 hours.

### SCIENTIFICALLY PROVEN RESULTS

In a laboratory study conducted in collaboration with MenidiMedica Biotech Greece, the Faculty of Public Health at the University of West Attica, and the Laboratory of Molecular Biology and Immunology at the Department of Pharmacy, Uni-

versity of Patras, VagoHealth effectively eliminated Trichomonas Vaginalis within 48 hours, while preserving normal vaginal flora.

Results:

- 24 Hours: Trichomoniasis cells in the control medium: 1,700,000 cells. With VagoHealth: 30,000 cells.
- 48 Hours: Trichomoniasis cells in the control medium: 1,300,000 cells. With VagoHealth: Eliminated!
