“Experience Relief and Well-Being”

What is a Bacterial Vaginal Infection?

Bacterial vaginal infections are common health issues affecting women of all ages. They occur when the delicate balance of bacteria in the vaginal area is disrupted, leading to discomfort and unpleasant symptoms. Such infections are typically caused by an overgrowth of harmful bacteria, and they can result in:

- Itching and Irritation
- Abnormal Vaginal Discharge
- Burning Sensation
- Unpleasant Odor

If left untreated, bacterial vaginal infections can lead to more serious complications, including:

- Pelvic Inflammatory Disease (PID)
- Recurrent Infections
- Premature Birth (in pregnant women)

“Introducing VagoClean - Your Solution!”

Easy-to-Use Kit

VagoClean, a product of MenidiMedica Biotech Greece, is here to help you take control of your vaginal health. Our 10 mL single-dose reagent offers a convenient and effective solution for cases where traditional therapeutic treatments have not yielded the desired results.

How It Works

1. Immerse the content of the monoreagent in sterile gauze provided.
 2. Gently insert the sterile gauze into the vagina for local washing.
 3. Leave it in for 1 minute.
 4. Remove the sterile gauze.
- If symptoms of bacterial infection persist, repeat the medical procedure after 8 calendar days with VagoClean for comprehensive relief.

Benefits of VagoClean

- Fast and Effective Relief
- Maintains Vaginal Balance
- Easy-to-Use Kit
- Sterile and Safe
- Supports Your Well-Being
